1.0 INTRODUCTION

1.1 In September 2018 Dr Paul Wilkinson of SWAT Archaeology carried out a historic building recording of Bailiff's Cottage off Lower Higham Road, Gravesend in Kent (Figures 1-9). The building is presently unoccupied and is about to be demolished.

1.2 The building recording was carried out on 28th September 2018 in accordance with a Level 2 survey as detailed in the English Heritage publication 'Understanding Historic Buildings: A Guide to Good Recording Practice' (2017). *The Institute of Field Archaeologists Standard and Guidance for the archaeological investigation and recording of standing buildings or structures* (2014) and the *KCC Historic Building Recording Requirements Part C*.

This is essentially a visual record. Historic England guidelines suggest that written information should be the minimum to identify the building's location, age, type, materials, use and when and whom compiled the report.

General photographs of the exterior as well as any specific architectural or historic features (both internal and external) should be taken.

1.3 In summary the work consists of a basic descriptive report accompanied by digital photographs.

1.4 The principal elements of the survey involved the creation of a record and description of the historic fabric of the building together with an analysis and interpretation of the buildings origins and historic development.

1.5 A review of Historic OS mapping has been made (Plates 1-3) and the Pevsner Architectural Guide (*Kent, West and the Weald* 2012) was consulted as was the National Heritage Register for England.

1.6 This report consists of a descriptive report accompanied by digital photographs and annotated plans.

2.0 HISTORICAL/ARCHAEOLOGICAL BACKGROUND

2.1 Location

The site is located on the north side of Lower Higham Road, with access to the site from an unmade road opposite Forge Lane (Figure 1).

To the north-west is the modern build of North Kent College and to the north North Kent College parking (Figure 1).

To the south east and south west of the site there are residential housing. The site is currently overgrown which restricts access. The OS location of Bailiffs Cottage is NGR 566721 173157 (Figure 2).

2.2 Setting

Bailiffs Cottage is located between Denton and West Court in Gravesend, Kent. It is an asymmetrical two storey building with a flattened t-shape plan. It has a gabled roof of dark grey slate tiles and pebbledash walls.

2.3 Statutory Designation

Bailiffs Cottage is not listed.

2.4 Significance of the Building

The significance of the building lies in its contribution to the relict farming scene with its much rebuilt exterior probably dating back to the late 18th century and is likely to be contemporary with the adjacent properties now demolished.

2.5 Historic Background

A rapid map assessment of OS historic mapping shows that in 1863 the building was part of the curtilage of Malthouse Farm shown more clearly on the 1875 OS map (Maps 1 & 2).

The aerial photograph of 1960 shows the farm still in existence but with additional urban development to the south (AP Plate 1) and the aerial photograph of 2003 shows Malthouse Farm to have disappeared and replaced by urban housing (AP Plate 2).

3. DESCRIPTION OF THE BUILDING

Bailiff's Cottage - Description of Elevations

1. Introduction

- Bailiff's Cottage is located between Denton and West Court in Gravesend, Kent.
- It is an asymmetrical two storey building with a flattened t-shape plan. It has a gabled roof of dark grey slate tiles and pebbledash walls.

2. Southern elevation

- Large wall dormer to the west of the elevation, set with two windows.
- Beneath the dormer is a narrow flat felt-roofed extension containing a porch to the east and a long window to the west.
- The porch opening is surmounted by a two-ring brick arch.
- The eastern third of the southern elevation has a larger eave height, and has a single narrow elevated chimney stack emerging from the side of the building at two metres up. To the east of this is a single window set low to the ground.

3. Eastern elevation

- Gable end with two small windows on the lower storey, set either side of a simple rectangular doorway.
- Tall narrow window to the south, set back from the main elevation.

4. Northern elevation

- To the east of the elevation, one window on the lower storey with a larger window on the upper storey set above it, directly under the eaves.
- Two storey bay set with one window on each storey.

5. Western elevation

- The western elevation is dominated by a large split chimney stack extending from the gable ridge forming a roughly inverted Y-shape

4. INTERIOR

4.1 The interior of the building was not available for study as there were Health and Safety issues with access to the building.

5.0 DISCUSSION

5.1 A review of the proposed development proposals show that Bailiffs Cottage is to be demolished and recording of the building is a planning condition.

6.0 PARAMETERS

5.1 The photographic survey was conducted using digital photography and as the exterior of the building was available drone coverage of the exterior of the building was undertaken. For drone footage of this building and archaeological sites recorded by SWAT Archaeology access here:

<https://www.dropbox.com/s/298ebdvh52a7om1/bailiffs%20cottage.mp4?dl=0>

5.2 This work did not include any investigation of below ground archaeology. Such work is administered separately by SWAT Archaeology to a WSI prepared for the Local Planning Authority.

5.3 The site survey took place on 28th September 2018 and photographs can be seen in the following Plates.
